## Proposal: Sharing ideas as widely as possible

We would like to combine a list of virtual project ideas, to be shared with all of you. If you have project ideas, you are welcome to share them. We will publish them with your name and organisation.

The point: staff in Vet-schools get virtual project ideas to start with. You are welcome to edit them or just get inspired by them.

We hope that virtual co-operation projects become popular world wide.

We are in this together! 😊

# New virtual project ideas

## 1. "International penpals" exchange of videos and assignments made by students

- Two teachers have their own whatsapp / signal etc. chat
- Classes share videos, every now and then through the teachers' chat
- Classes have the same topic or send questions / challenges / problems to the foreign class
- The topics can be cultural or vocational

## 2. Online –interviews

- Students interviewing each other via Teams
- Questions are prepared beforehand
- Students contact international students by email, arrange an interview time, and send Teams invitations
- Students need to find out about things related to foreign culture, trade, their vocational field etc.

Inspired by Green Academy's project / Denmark

## 3. Joining lessons through Teams

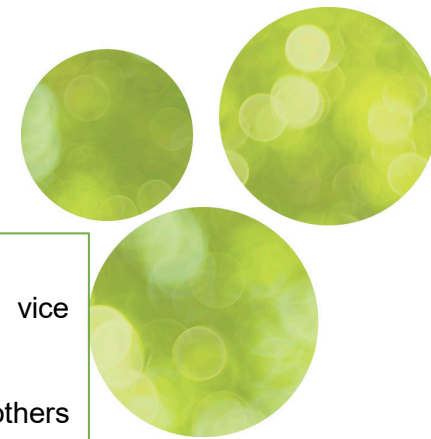

- International students will participate to Finnish lessons and vice versa
- Are there regular lessons you could hold in English, and invite others to join? Lessons that would take place in any case?

## 4. Teachers virtual coffees for networking

- Teachers from different countries have a virtual coffee break to get to know each other, and to share experiences.
- A relaxed way to start virtual co-operation or just to meet international colleagues

## 5. Joint lessons

- Teachers from different countries hold a lesson together via Teams
- Teachers can ask questions from each other, or from the students. Students can ask questions from each other (questions are prepared beforehand), have quizzes, share videos, use breakout -rooms, use chat-function, held votes.

# New virtual project ideas

## 6. “ My profession in my culture”

- Similar idea as “penpals”, but the students share the videos directly to each other via instant messaging apps and are communicating - more interaction!
- Creating mixed international student groups in instant messaging application
- Students get assignments, and answer to their chat-channel with videos, photos, text or voice messages
- Reflecting in the classroom e.g. on similarities/differences, some feedback to the “penpals”

## 7. Mini Skills competition

- Groups in their own countries and classes carry out old skills competition semifinals or final assignments
- Event for one day. Assignment in the morning, presentation of the results in the evening / afternoon.
- Teams video connection / live-meeting is on, the whole day
- Teams video shown on the classroom wall, so everyone will see what is happening in the other country.

## 8. Interaction in Virtual Reality (VR) -environment

- Students meet international students in e.g Keuda’s VR-environment
- Finnish students show Keuda-campus to foreign students, students make interviews, compete, held guided tours, quizzes, games, getting to know each other
- Keuda starts a KA2 –project on VR in VET in 03/2021. We will invite you to open events, let us know if you are interested! Piloting takes place in math, electricity, and English communication

## 9. Company gives an assignment

- Company gives an assignment or problem to students
- Students seek information, come up with ideas or solve a problem either in mixed groups or among their own class.
- The results are shared either in Teams together or sent to the foreign class

Inspired by Foodwaste challenge by Friesland College / the Netherlands
